

All Adaptive Spheres

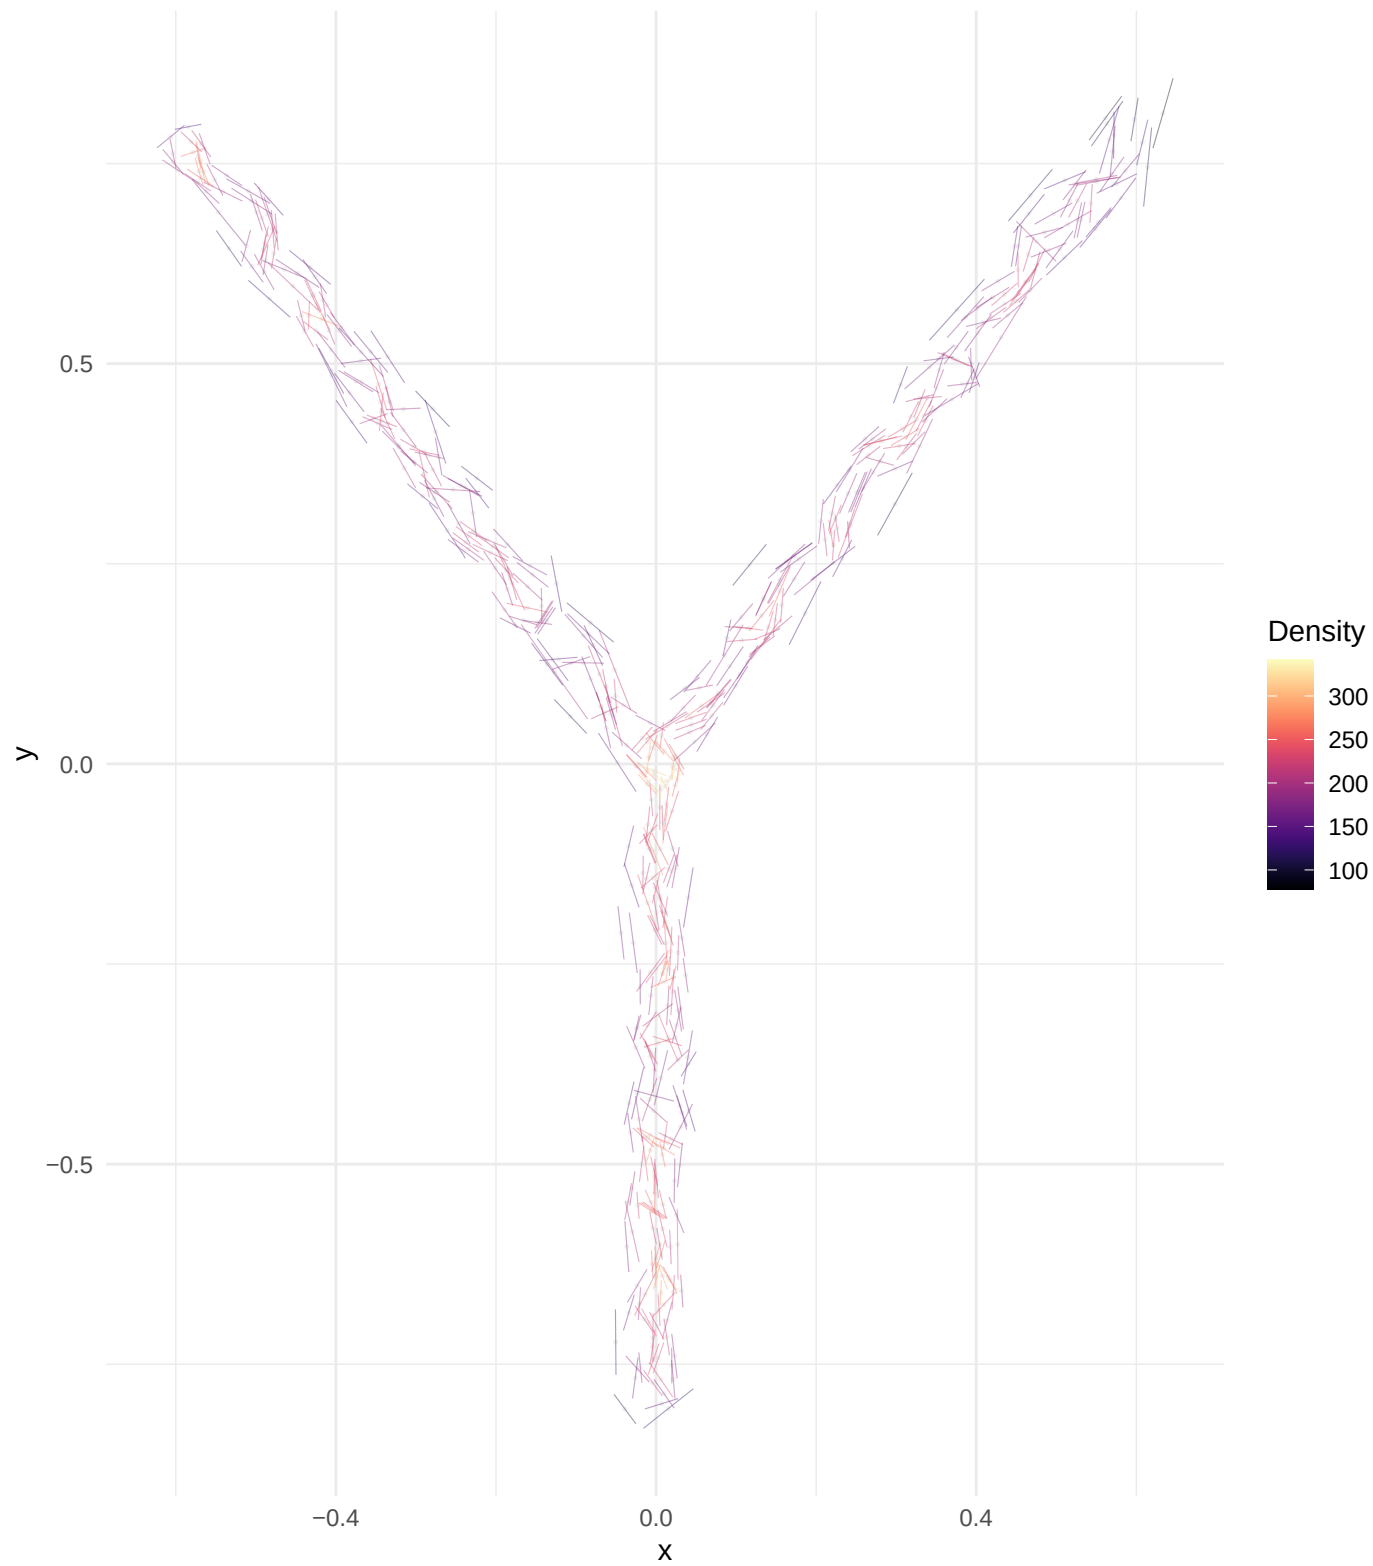

Visualizing local neighborhood size (radius) for every point.

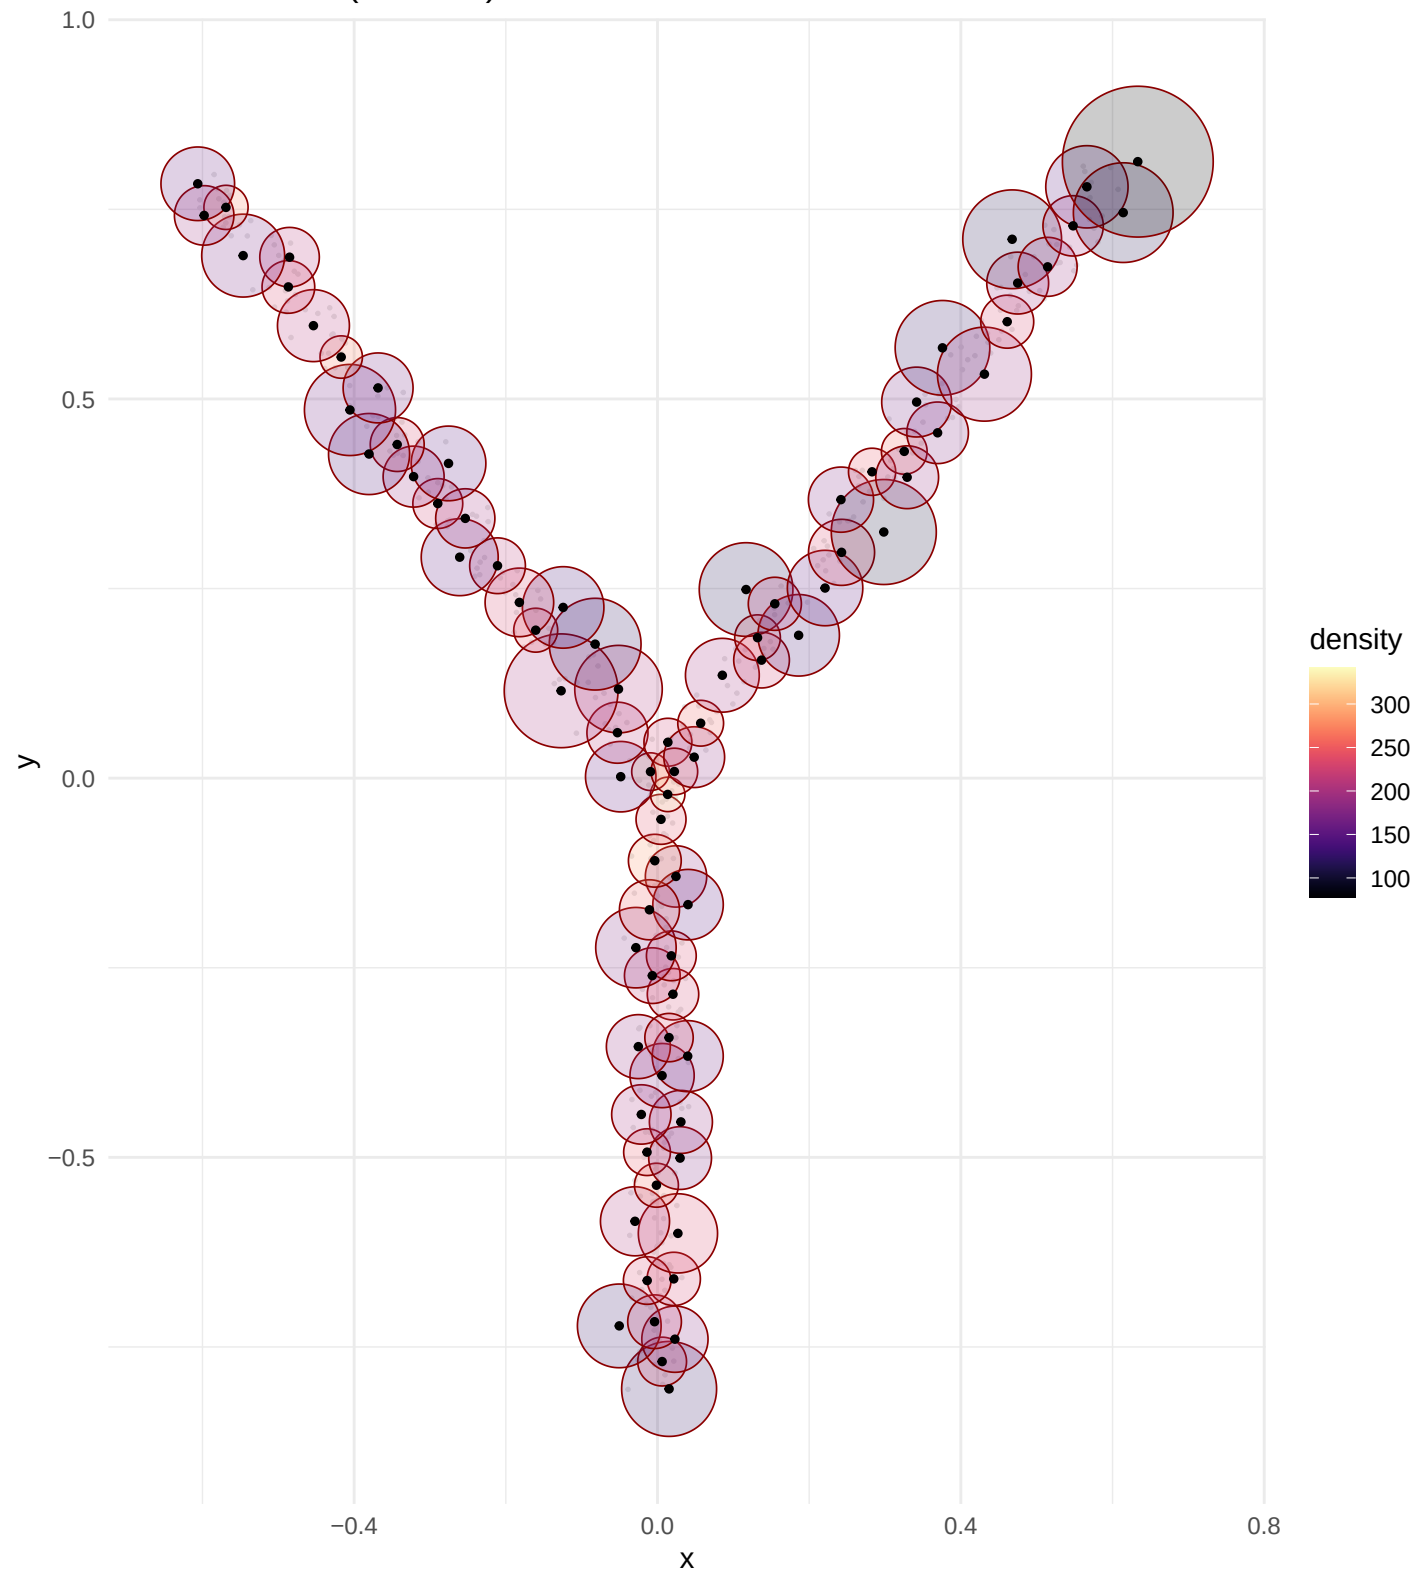

Point Density Distribution

Global Tangent Field (PC1)

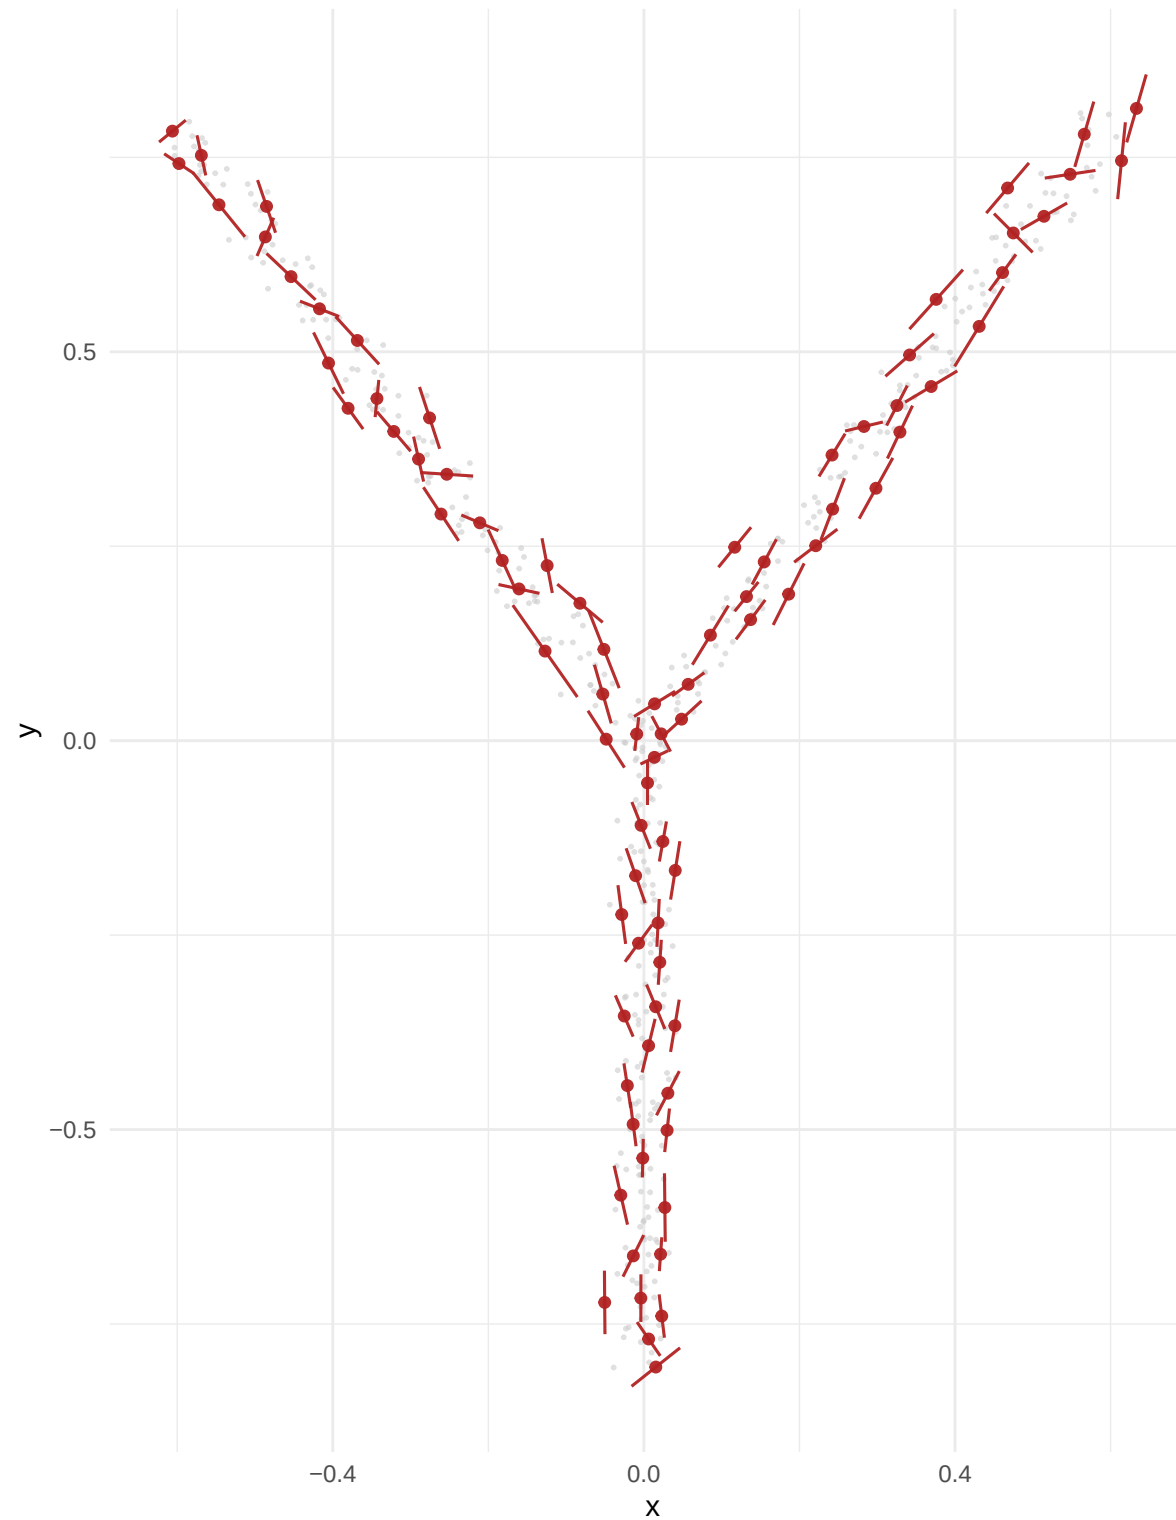

Atlas Selection (Anchors)

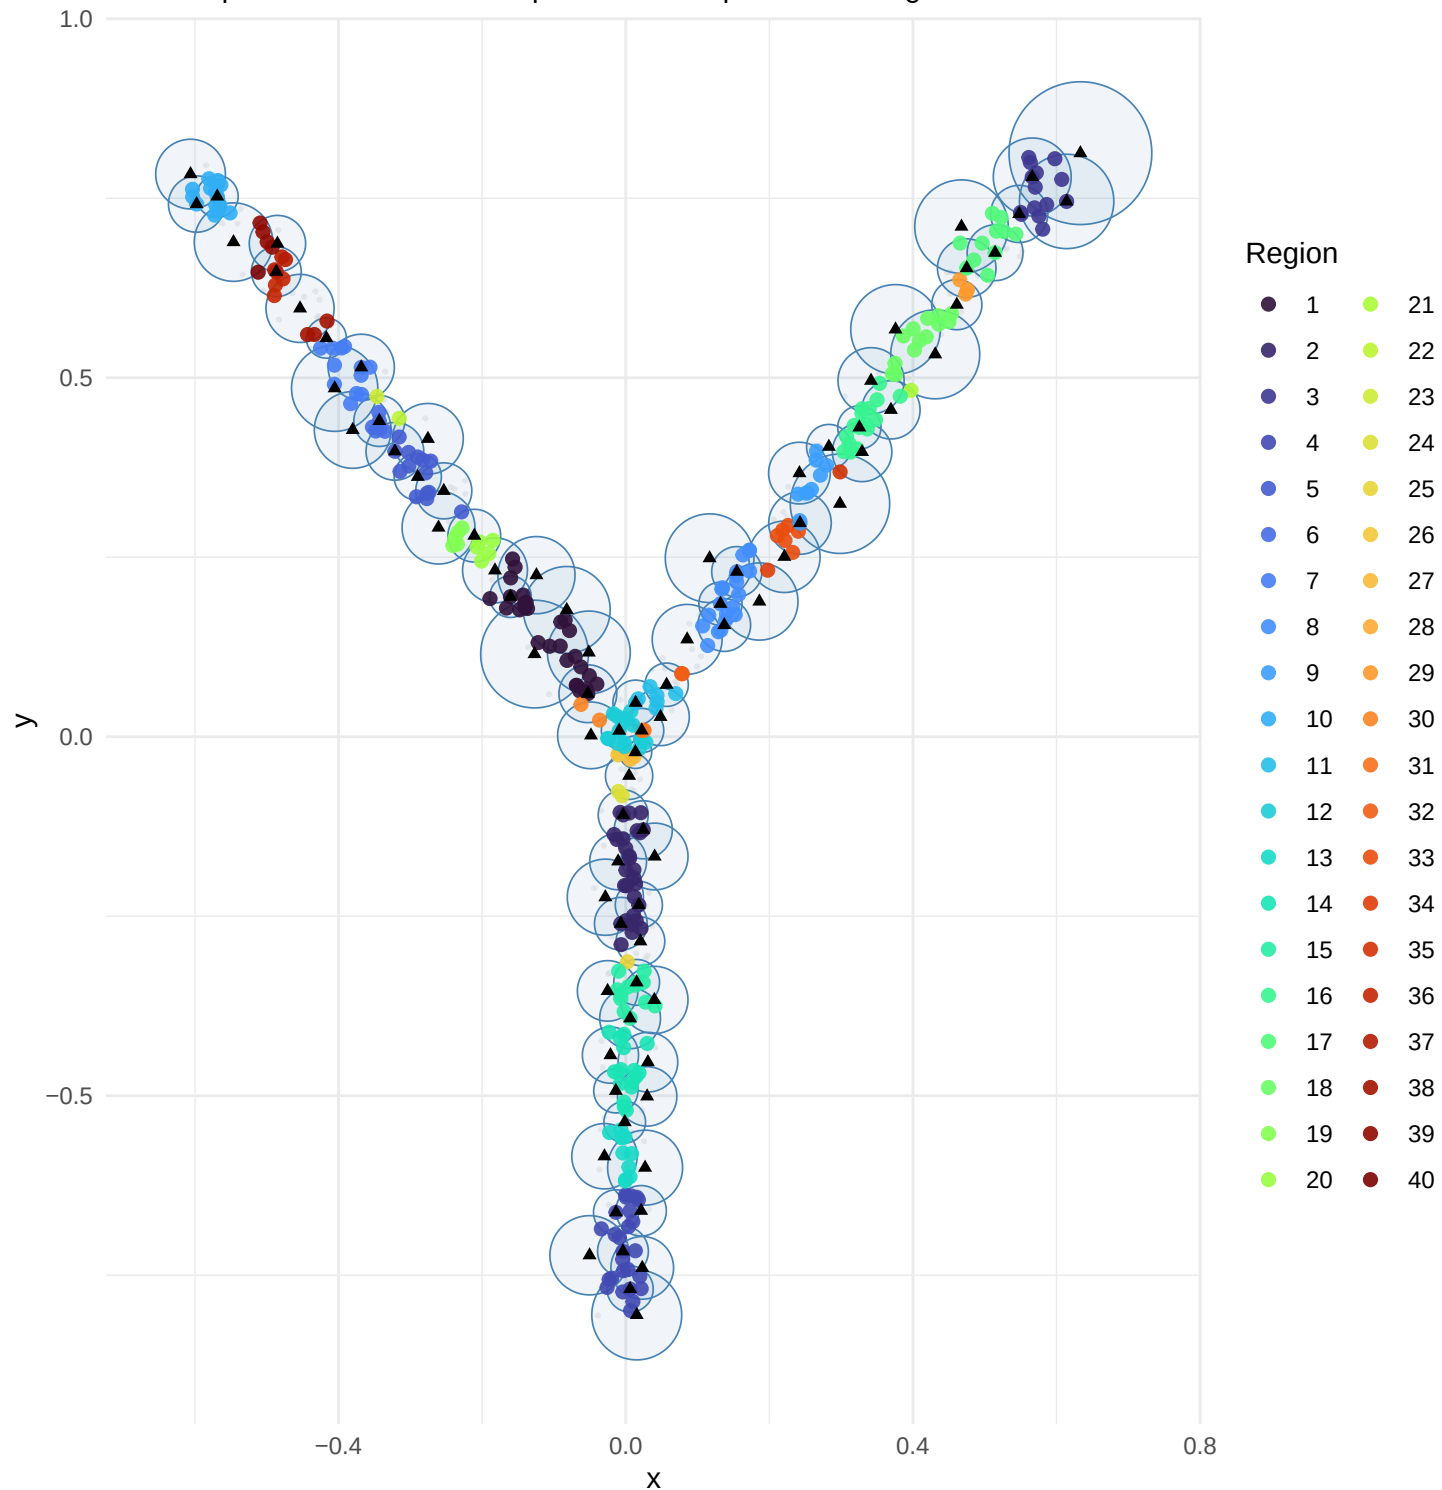

Anchor SVD Segments

Same anchors as plot 4: spheres first, then their SVD (PC1) in red

Intersection Regions (2+ anchors)

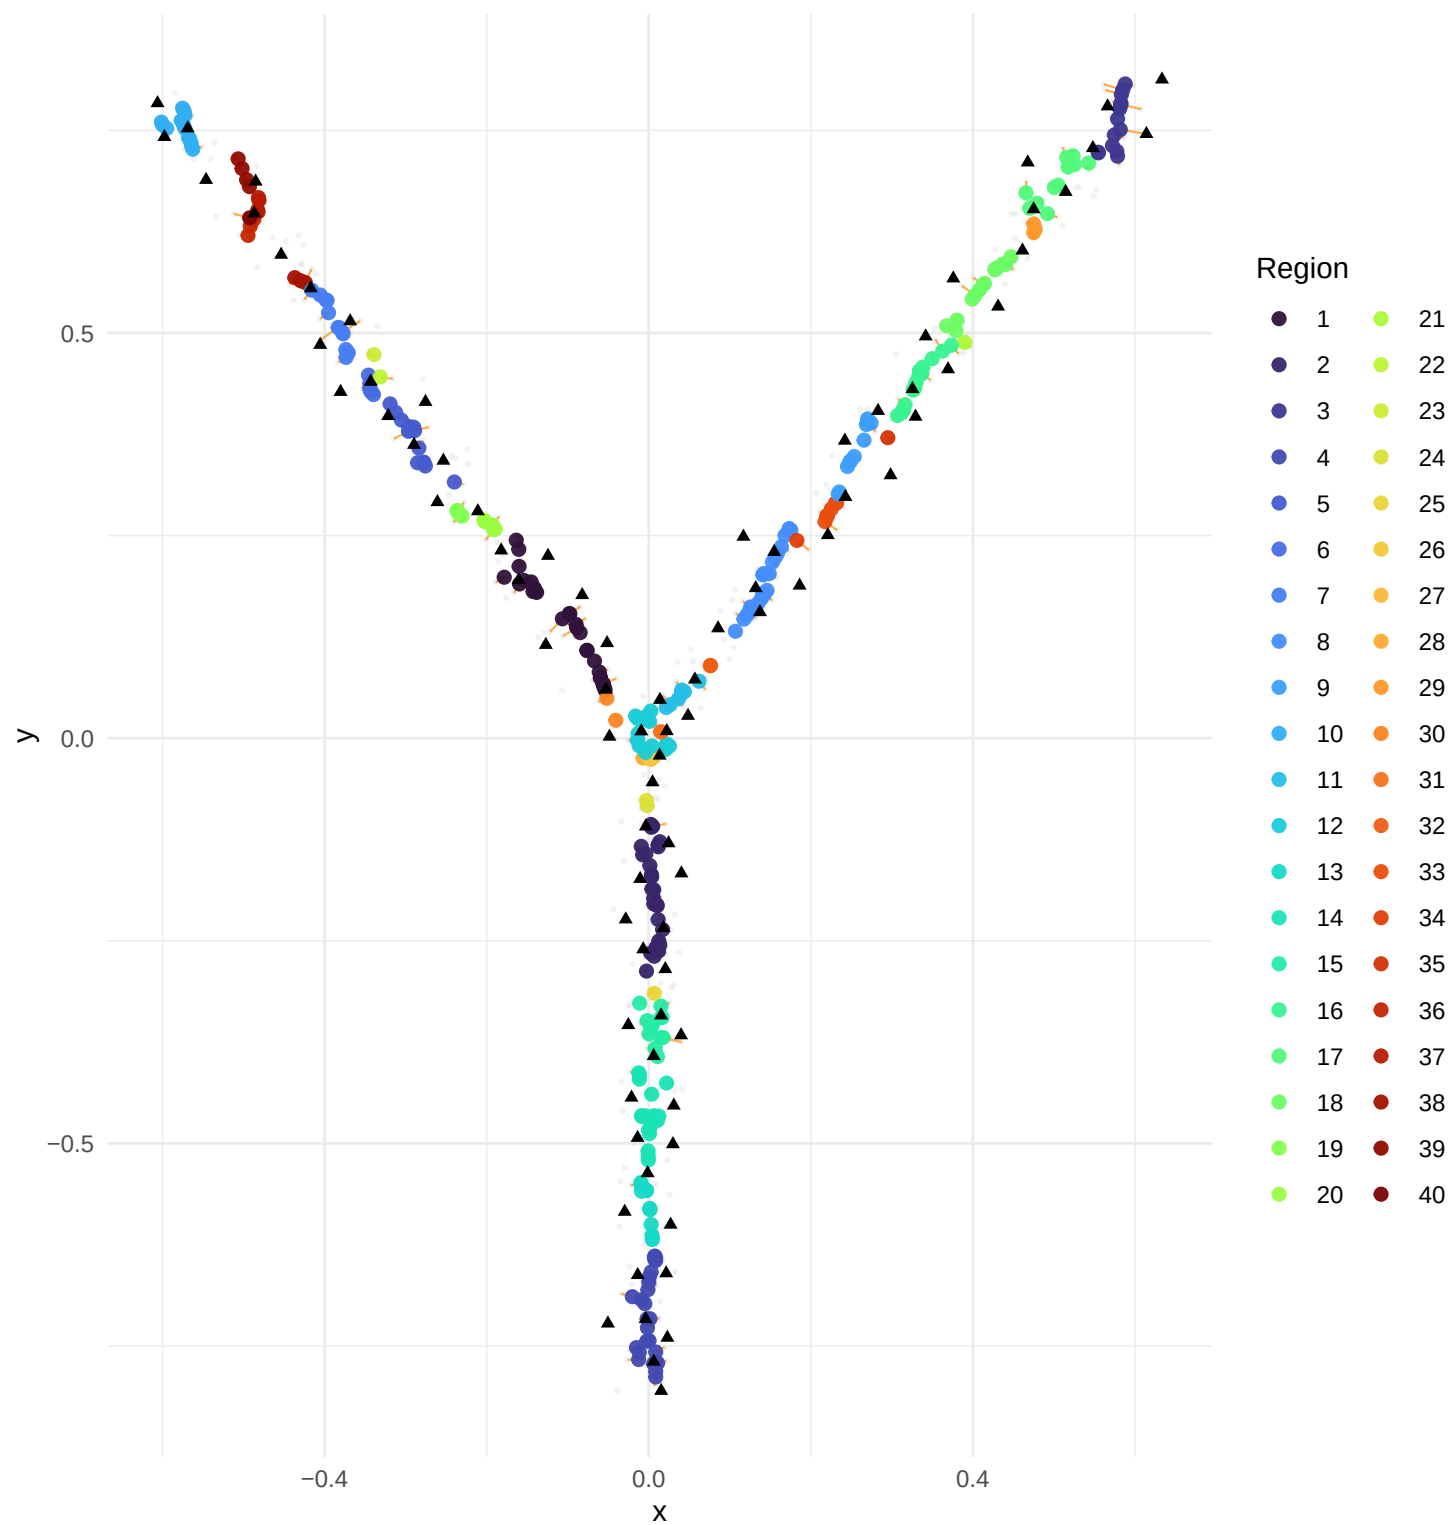

Anchor spheres in blue. Colored points = overlap zones. Triangles = anchor centers.

Parameters: k_min = 10, g_threshold = 3.0, o_max = 0.3, o_min = 0.10, stability = 0.90, scale_factor = 2.5, max_iter = 50, conv_tol = 0.01

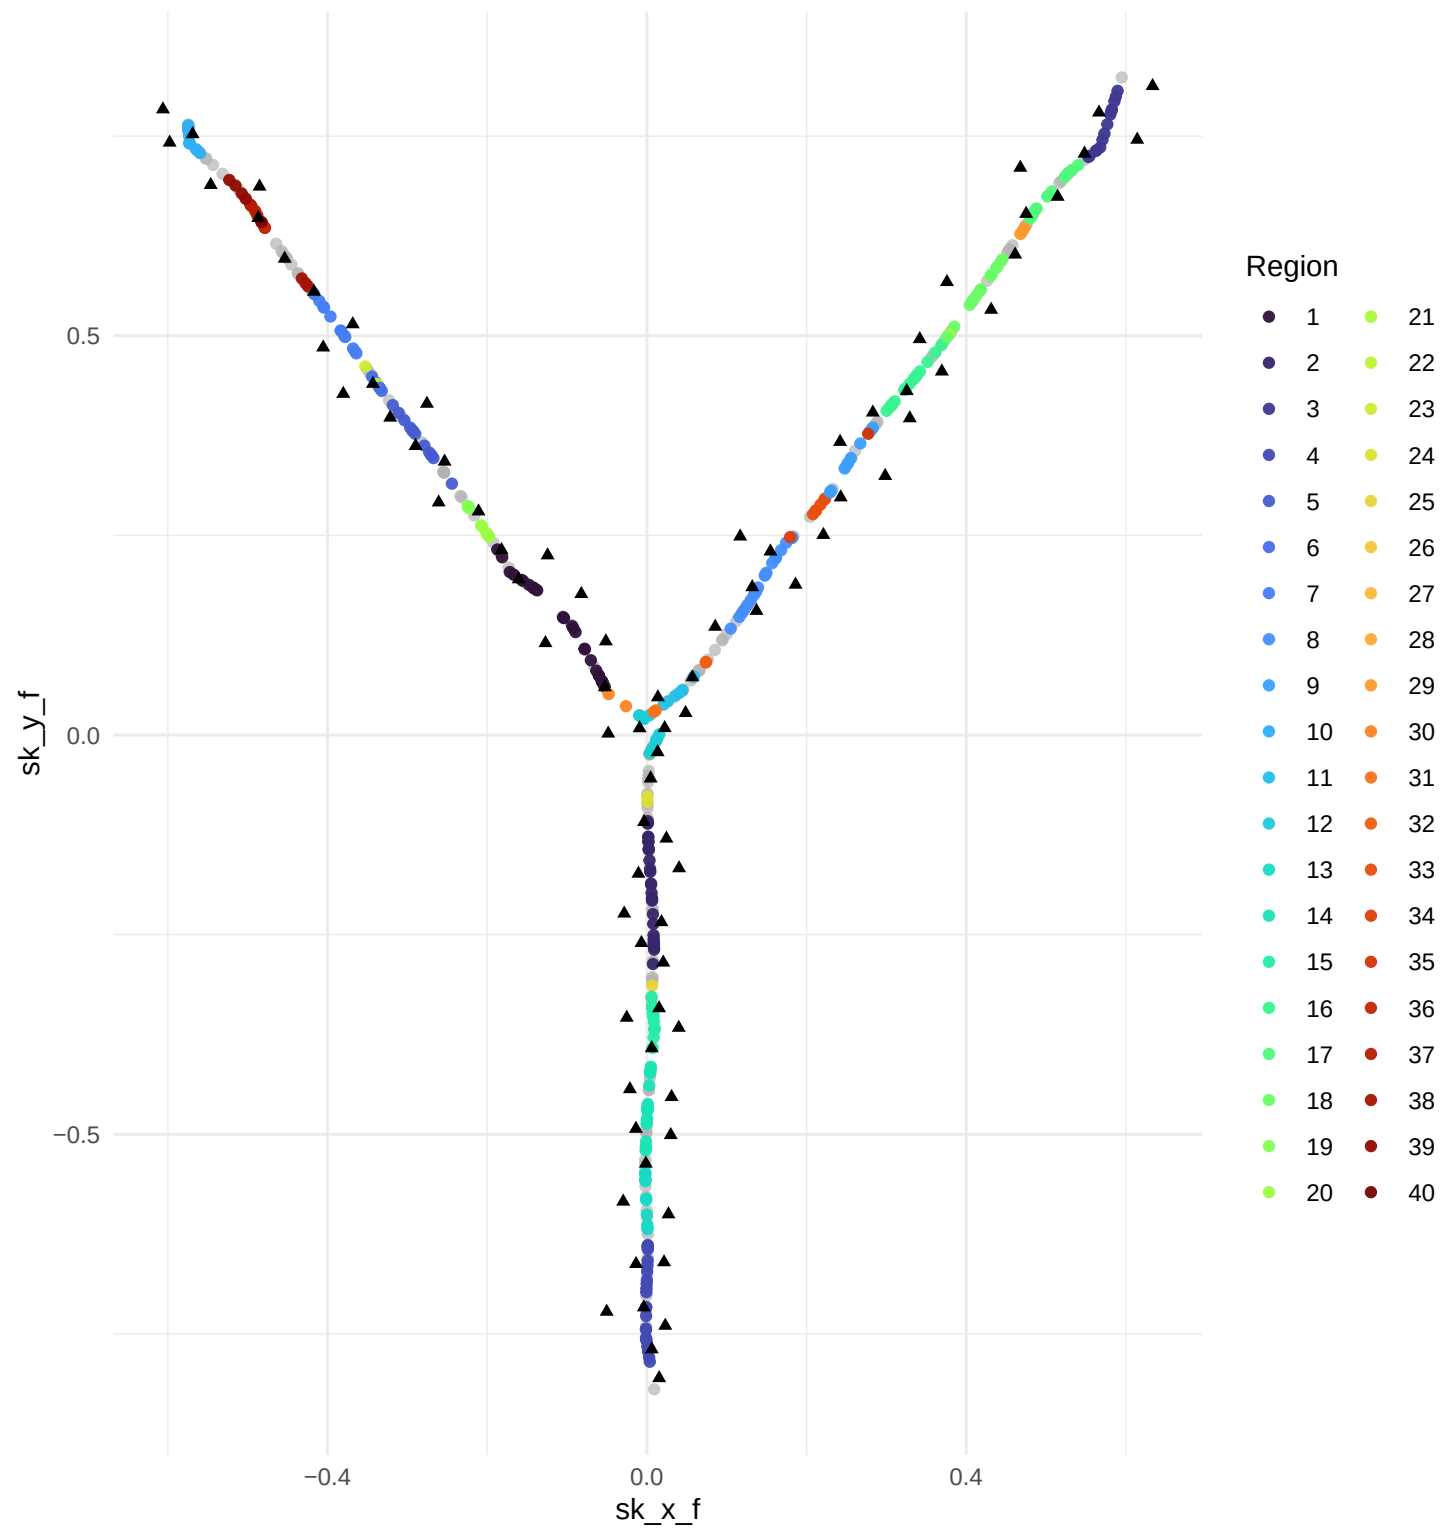

Stitched Backbone (Iteration 1)

Orange path: stitching; Triangles: original anchors

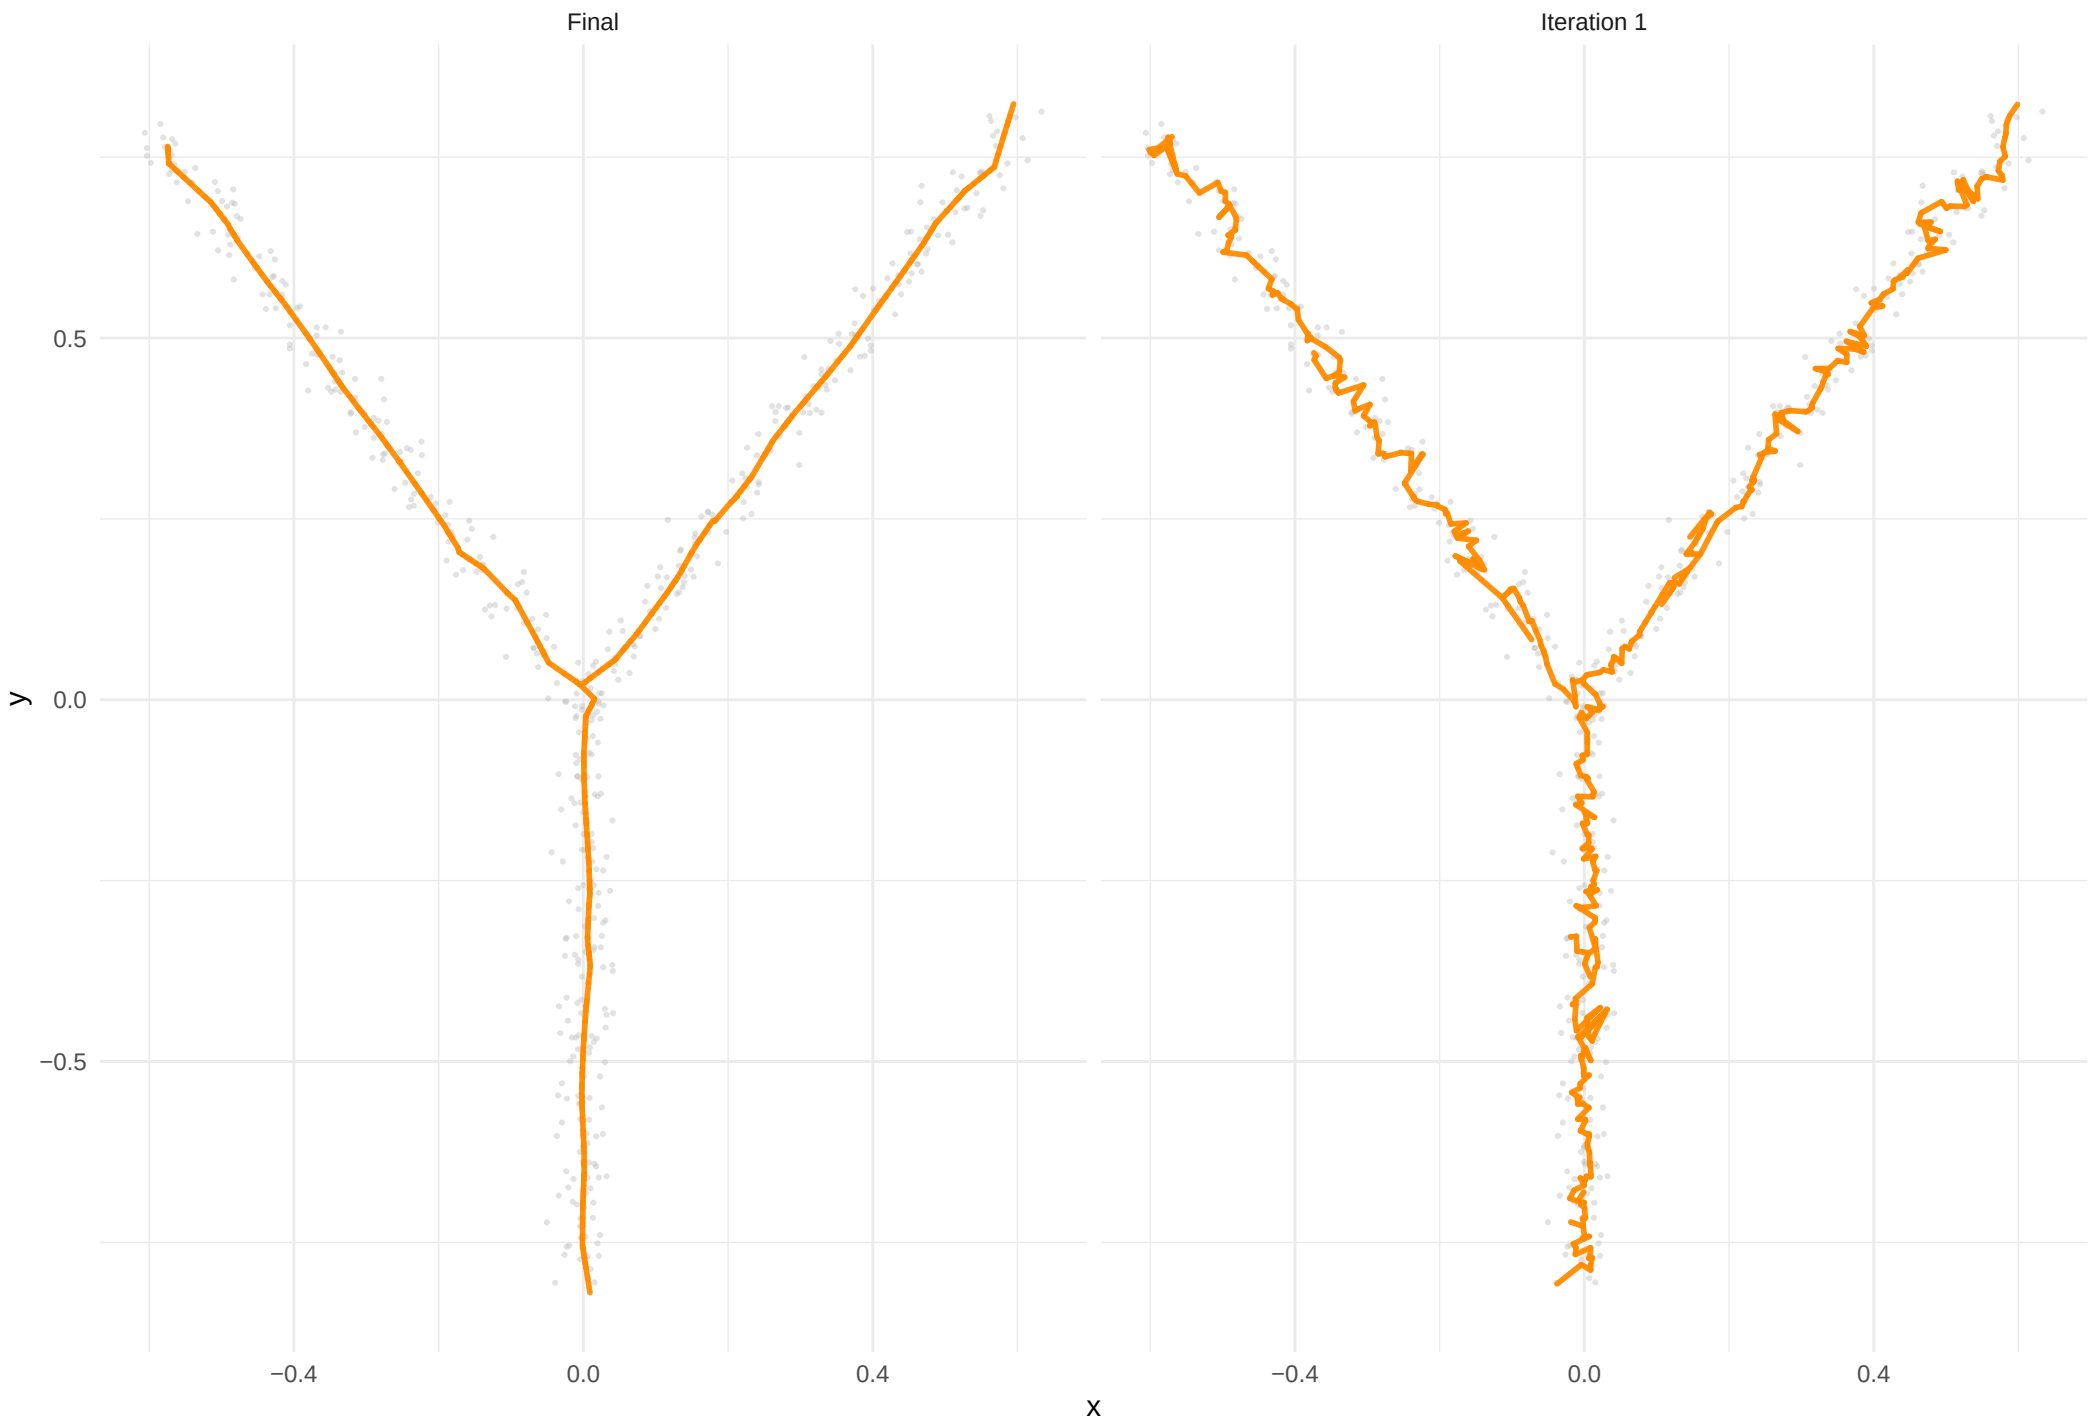

Final Stitched Backbone (Converged)

Final stitched points

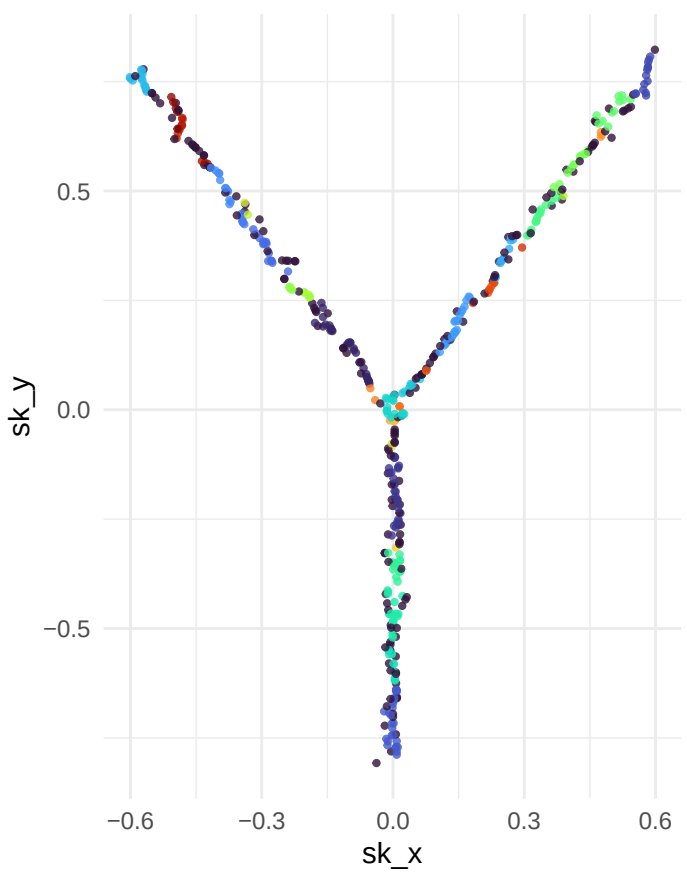

Backbone Edges

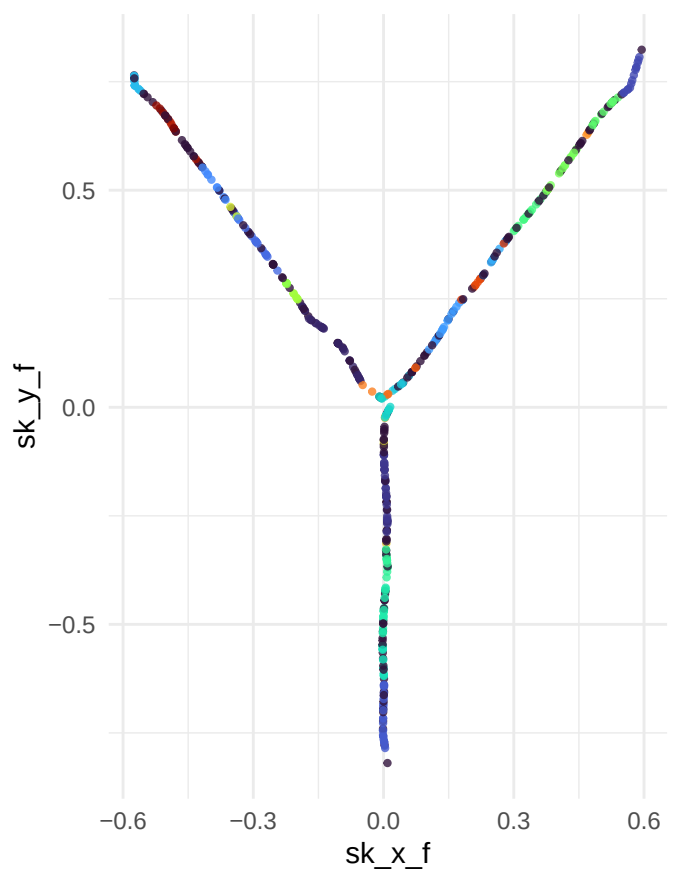

Convergence: iteration 1 vs final

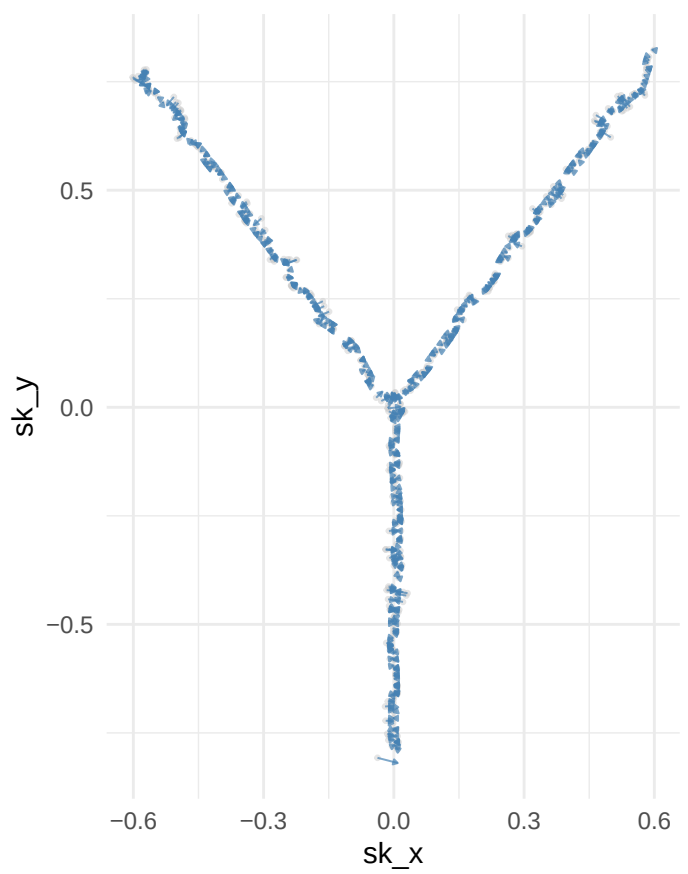

Iteration 1

Converged

Displacement iter1 -> final
Points moved > 1e-6: 500 / 500

Parameters: $k_min = 10$, $g_threshold = 3.0$, $o_max = 0.3$, $o_min = 0.10$, $stability = 0.90$, $scale_factor = 2.5$, $max_iter = 50$, $conv_tol = 0.01$
