

All Adaptive Spheres
Visualizing local neighborhood size (radius) for every point.

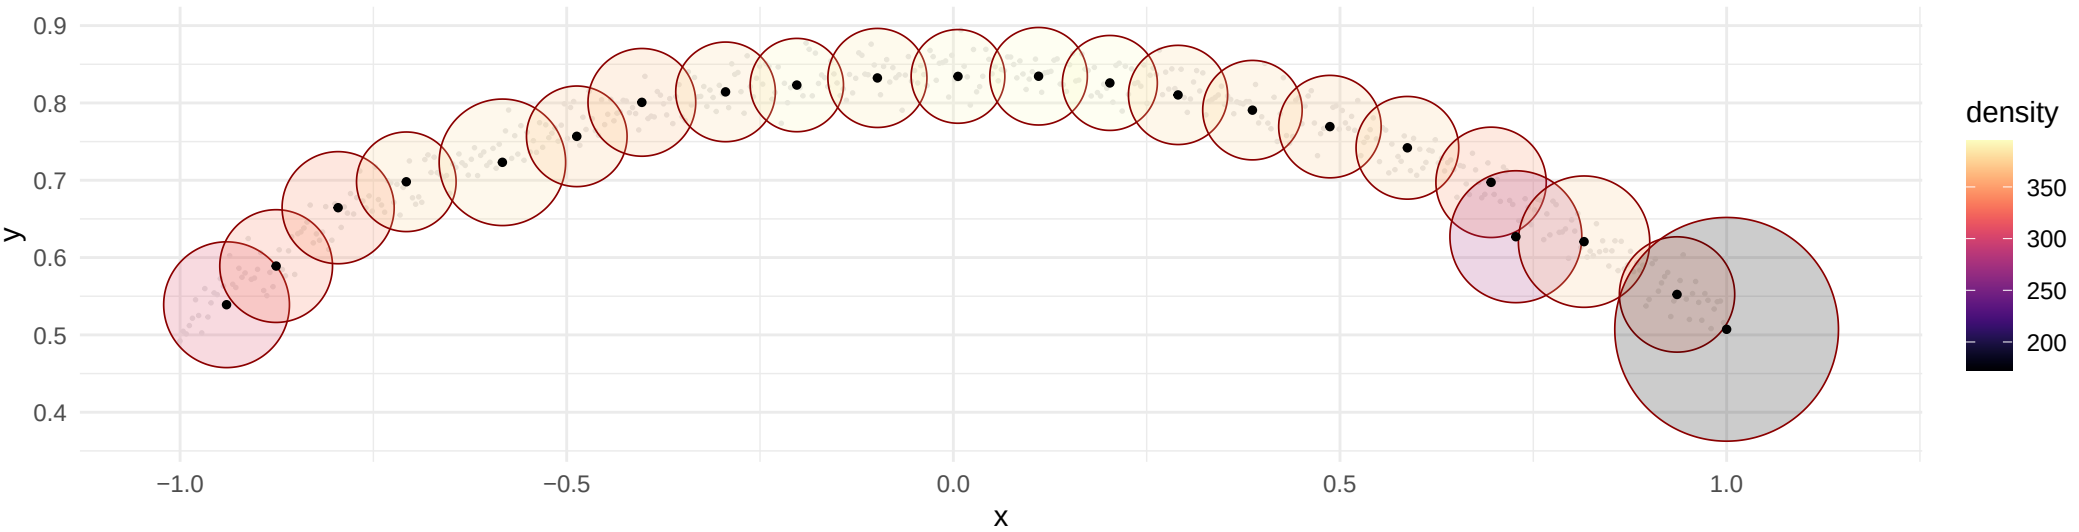

Point Density Distribution

Global Tangent Field (PC1)

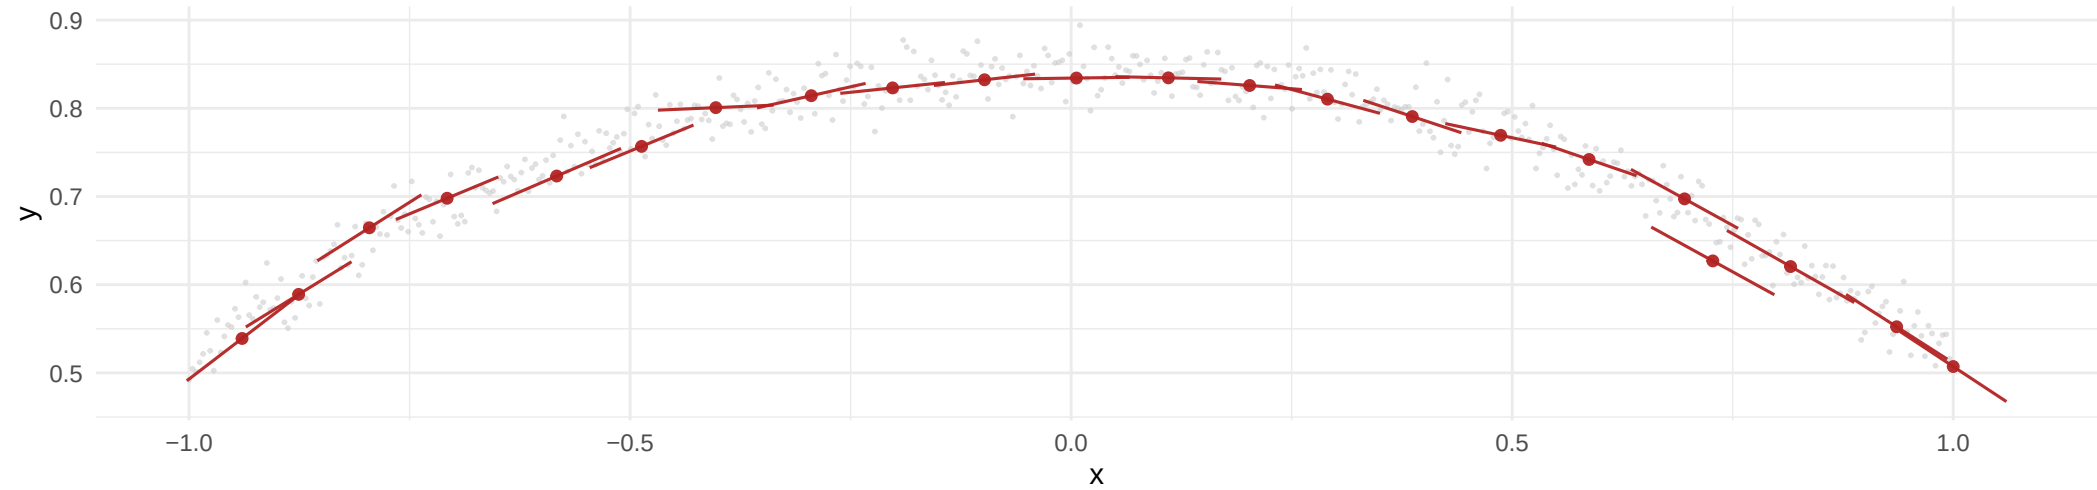

Atlas Selection (Anchors)

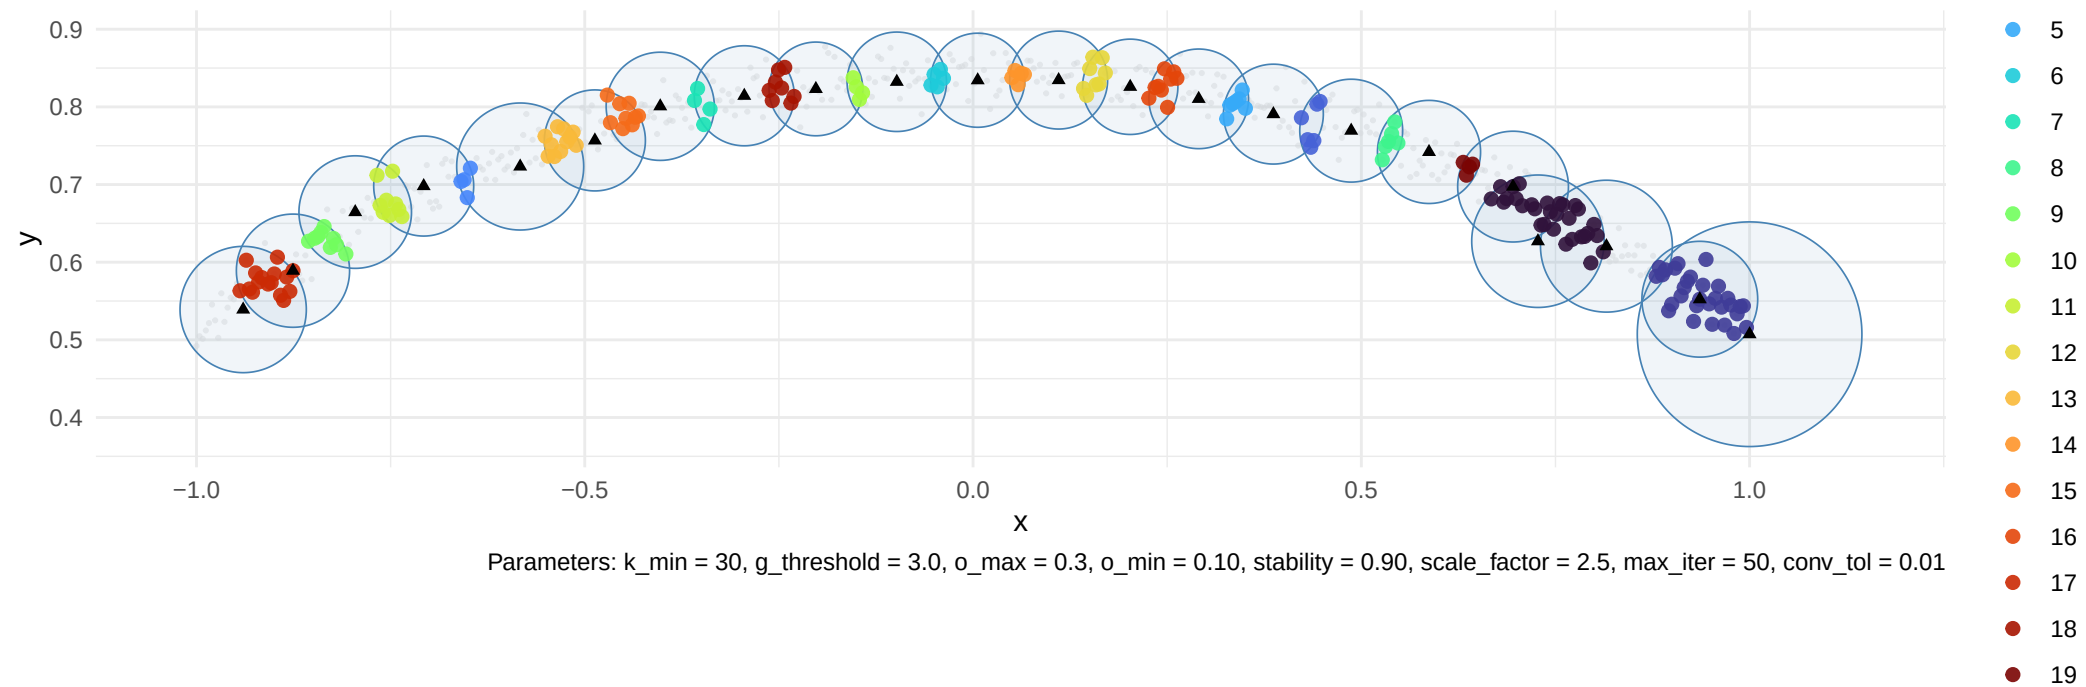

Anchor SVD Segments

Same anchors as plot 4: spheres first, then their SVD (PC1) in red

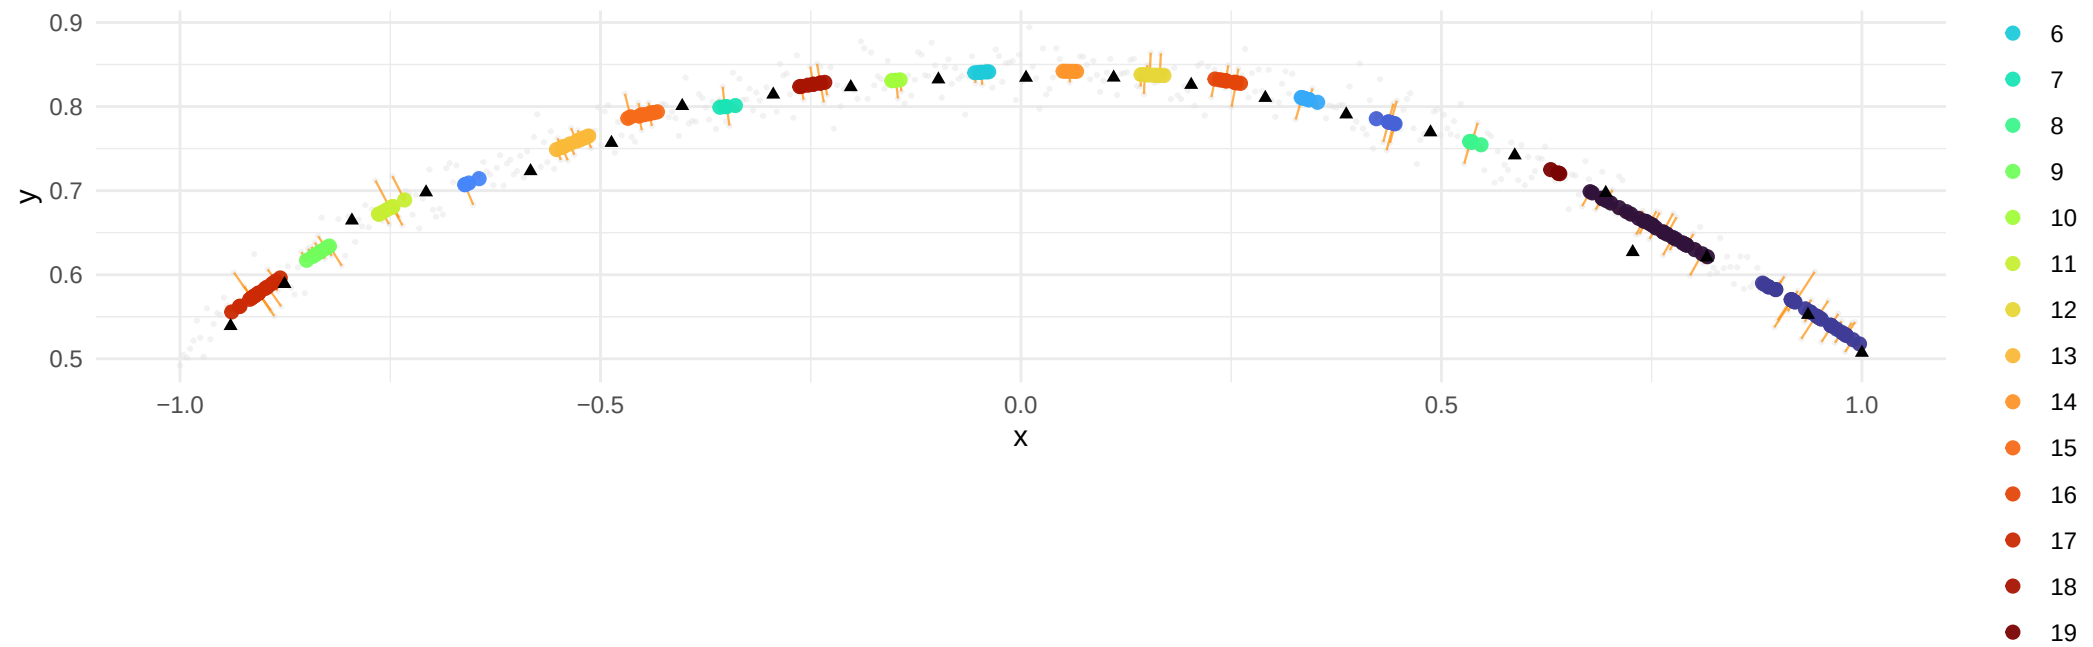

Intersection Regions (2+ anchors)

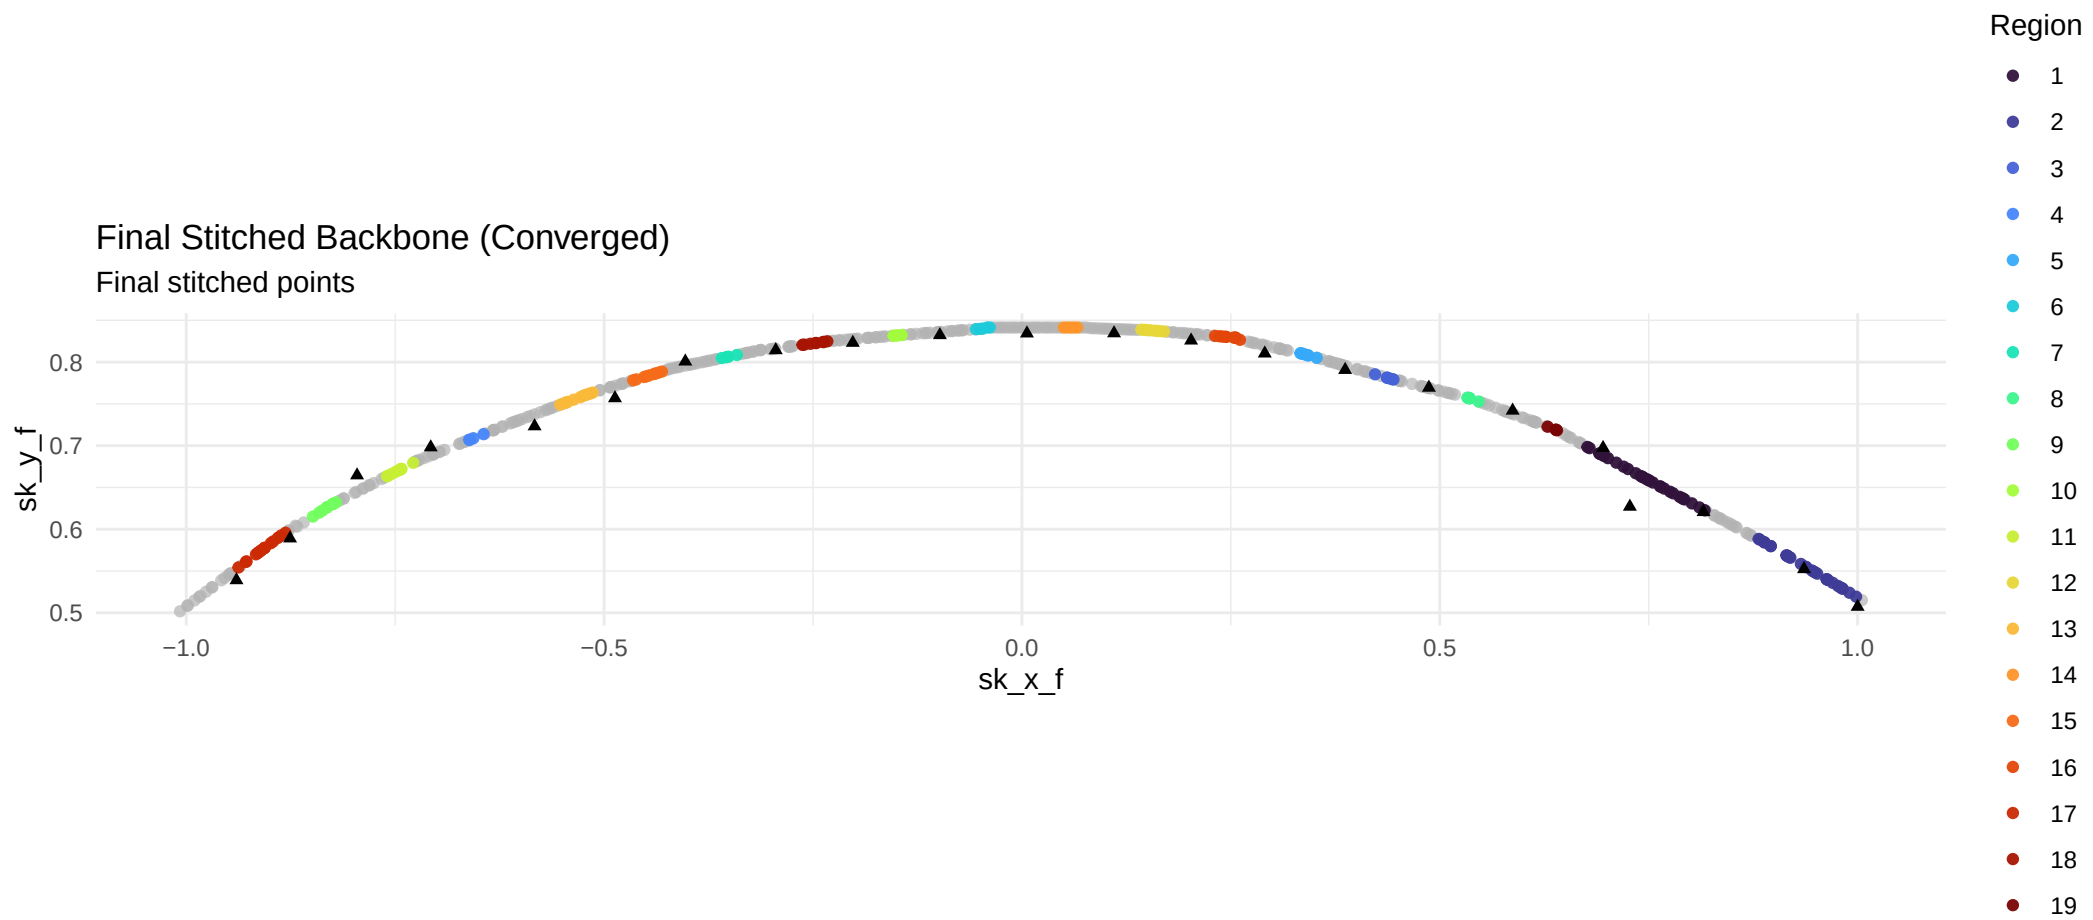

Anchor spheres in blue. Colored points = overlap zones. Triangles = anchor centers.

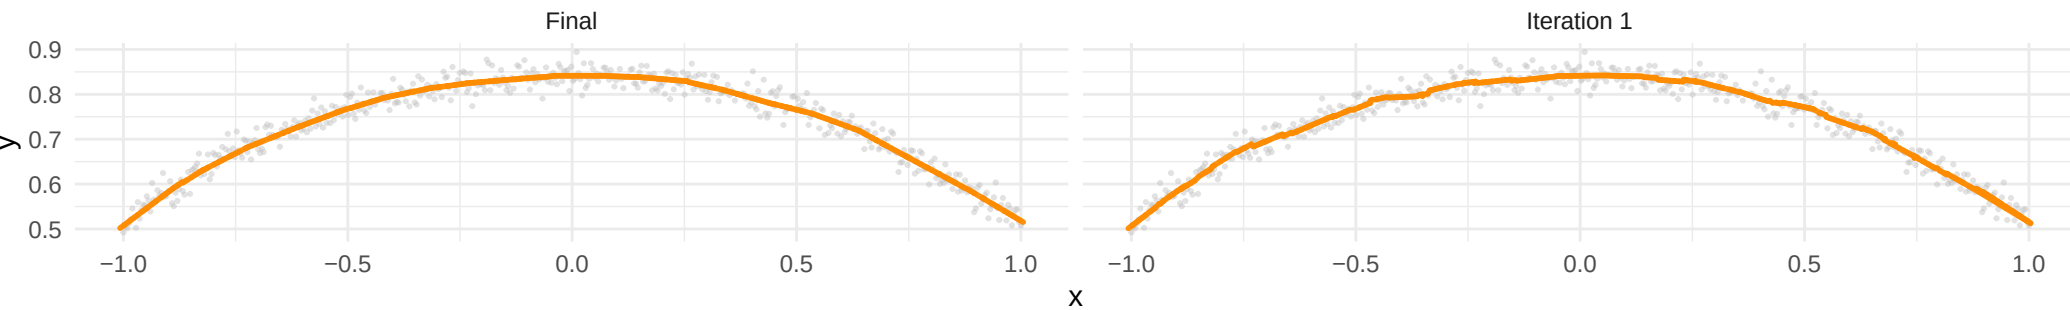

Stitched Backbone (Iteration 1)

Orange path: stitching; Triangles: original anchors

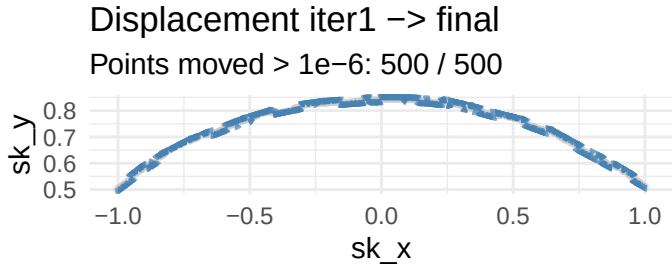

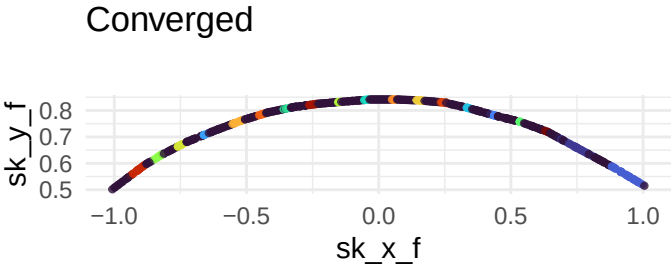

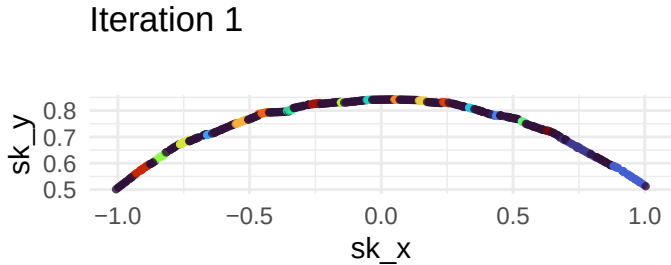

Backbone Edges

Convergence: iteration 1 vs final

Parameters: $k_{min} = 30$, $g_{threshold} = 3.0$, $o_{max} = 0.3$, $o_{min} = 0.10$, $stability = 0.90$, $scale_factor = 2.5$, $max_iter = 50$, $conv_tol = 0.01$
